

Expansion at Tri-City Pollution Control Plant in Oregon City.

Thank You Everyone!

SEWAGE-TREATMENT AGREEMENT REACHED MEETING NEEDS OF NORTH CLACKAMAS COUNTY

On December 18, 2008, the Board of Clackamas County Commissioners (BCC) made the goal of protecting our environment more of a reality. Acting as the governing board of both Clackamas County Service District No. 1 (CCSD #1) and the Tri-City Service District, the BCC adopted an Intergovernmental Agreement (IGA) years in the making. It serves as the legal framework for how the Tri-City Water Pollution Control Plant in Oregon City will be expanded by CCSD #1 to meet the growing sewage-processing demands of North Clackamas County.

This IGA is the result of hard work and collaboration by the BCC and (1) the Tri-City Advisory Board, representing the cities of Oregon City, Gladstone and West Linn on behalf of the Tri-City District, and (2) the Citizen Advisory Council for CCSD #1, serving unincorporated areas of North Clackamas County, as well as Milwaukie and Happy Valley. Read more at <http://www.riverhealth.org/>.

This agreement is the formal recognition that the longstanding debate is over about how the County will meet its obligation to protect our streams. **It's also great for business and the economy!**

The Clackamas County Business Alliance
says Thank You everyone!
